GPC are proud to announce that due to the COVID-19 pandemic we are going to be providing 6 month free licensing to our NHS Clients and Colleagues. GPC are investing their software to support the NHS during their staff shortages and enhanced pressure due to COVID-19.

### What is GPC's Wound Measure?

Simply by taking a picture and using our 3D technology to accurately measure and monitor patient wounds (as stipulated by NICE) such as pressure ulcers.

### How will this help during the COVID-19 crisis?

Reduce nurse visits to care homes.

Reduce patient travel to clinics and hospitals

No physical contact and no need for experts to measure wounds

Reduce the length of time it takes to measure a wound by up to 70%

Increase the efficiency of expert support such as Tissue Viability Nurses

### Helping the NHS to manage the huge increase in demand by

Releasing critical nurse resource whilst continuing to support patients with pressure injuries

Reducing face to face and physical contact and potential spread of the virus

Patients with wounds such as pressure ulcers can be monitored safely, securely and accurately remotely by specialist nurses.
